- Temple, Cave.
- Stream: perennial, non perennial
- Canal, Spring
- Lakes: Fresh water, Salt water, Dry
- Boundaries: International, State, District

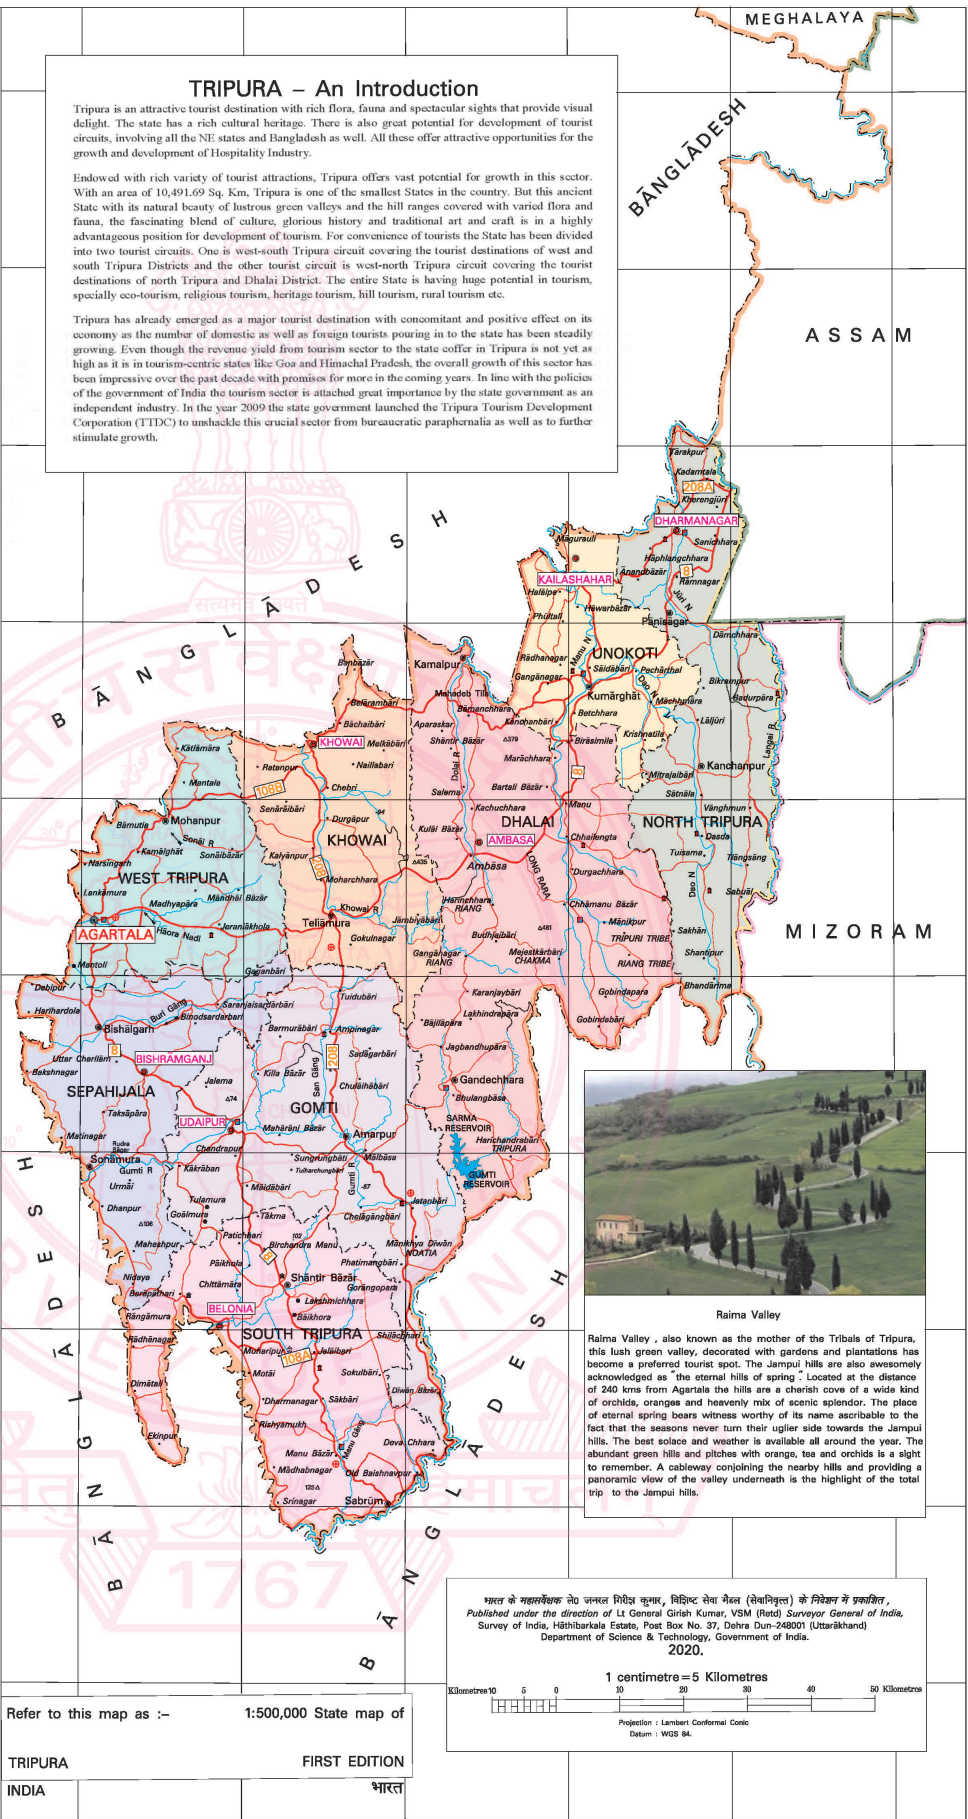

### TRIPURA - An Introduction

Tripura is an attractive tourist destination with rich flora, fauna and spectacular sights that provide visual delight. The state has a rich cultural heritage. There is also great potential for development of tourist circuits, involving all the NE states and Bangladesh as well. All these offer attractive opportunities for the growth and development of Hospitality Industry.

Endowed with rich variety of tourist attractions, Tripura offers vast potential for growth in this sector. With an area of 10,491.69 Sq. Km, Tripura is one of the smallest States in the country. But this ancient State with its natural beauty of lustrous green valleys and the hill ranges covered with varied flora and fauna, the fascinating blend of culture, glorious history and traditional art and craft is in a highly advantageous position for development of tourism. For convenience of tourists the State has been divided into two tourist circuits. One is west-south Tripura circuit covering the tourist destinations of west and south Tripura Districts and the other tourist circuit is west-north Tripura circuit covering the tourist destinations of north Tripura and Dhalai District. The entire State is having huge potential in tourism, specially eco-tourism, religious tourism, heritage tourism, hill tourism, rural tourism etc.

Tripura has already emerged as a major tourist destination with concomitant and positive effect on its economy as the number of domestic as well as foreign tourists pouring in to the state has been steadily growing. Even though the revenue yield from tourism sector to the state coffers in Tripura is not yet as high as it is in tourism-centric states like Goa and Himachal Pradesh, the overall growth of this sector has been impressive over the past decade with promises for more in the coming years. In line with the policies of the government of India the tourism sector is attached great importance by the state government as an independent industry. In the year 2009 the state government launched the Tripura Tourism Development Corporation (TTDC) to unshackle this crucial sector from bureaucratic paraphernalia as well as to further stimulate growth.

Raima Valley

Raima Valley, also known as the mother of the Tribals of Tripura, this lush green valley, decorated with gardens and plantations has become a preferred tourist spot. The Jampui hills are also awesomely acknowledged as the 'eternal hills of spring'. Located at the distance of 240 kms from Agartala the hills are a cherish cove of a wide kind of orchids, oranges and heavenly mix of scenic splendor. The place of eternal spring bears witness worthy of its name ascribable to the fact that the seasons never turn their uglier side towards the Jampui hills. The best solace and weather is available all around the year. The abundant green hills and pitches with orange, tea and orchids is a sight to remember. A cableway conjoining the nearby hills and providing a panoramic view of the valley underneath is the highlight of the total trip to the Jampui hills.

भारत के सर्वेक्षण के दिशा में Lt General Gireesh Kumar, VSM (Retd) Surveyor General of India, Survey of India, Hithibarkala Estate, Post Box No. 37, Dehra Dun-248001 (Uttarakhand) Department of Science & Technology, Government of India. 2020.
